What is claimed is:

- 1. A method for the treatment of glomerulonephritis in a patient in need of such treatment comprising introducing an antibody that binds to complement component C5 into the patient's bloodstream in an amount effective to substantially reduce the cell-lysing ability of complement present in the patient's blood.
- 2. The method of Claim 1 wherein the antibody reduces the conversion of complement component C5 into complement components C5a and C5b.
- 3. The method of Claim 1 wherein the antibody binds to C5b.
- 4. The method of Claim 1 wherein the antibody does not substantially inhibit formation of complement component C3b.
- 5. The method of Claim 1 wherein the antibody is introduced into the patient's bloodstream in a dose that is not greater than 0.1 grams per kilogram.
- 6. An article of manufacture comprising packaging material and a pharmaceutical agent contained within said packaging material, wherein:
- (a) said pharmaceutical agent comprises an antibody to complement component C5, said antibody being effective in substantially reducing the cell-lysing ability of complement present in the patient's blood; and

- (b) said packaging material comprises a label which indicates that said pharmaceutical agent is for use in the treatment of kidney disease.
- 7. The article of manufacture of Claim 6 wherein the label indicates that said pharmaceutical agent is for use in the treatment of nephritis.
- 8. The article of manufacture of Claim 7 wherein the label indicates that said pharmaceutical agent is for use in the treatment of glomerulonephritis.
- 9. The article of manufacture of Claim 6 wherein the pharmaceutical agent is to be used at a dosage level not greater than 0.1 grams per kilogram.
